

## DuKabel Top Series AUDIO STEREO CABLE

Whether you are audio fanatic and music lover who has obsessed with crystal clear sound and audio technology or just a person who want to connect its phone with the car and play few tunes while driving, it is certain that you going to need some AUX cables. The auxiliary inputs or AUX is your common audio connection type which can be found in a various car, home or professional applications.

However, despite being common the AUX cable isn't something you should take for granted and choose by price or length. No, there is much more to AUX cables than that and we are going to help you chose the best AUX cable by following these simple buying tips.

If you looking for a good AUX cable and perfect balance of quality and affordable price, the DuKabel Top Series Audio Stereo Cable could be the product for you. It is a 4-foot long braided AUX cable compatible with practically all smartphones, tablets and media devices.

However, it will not fit Beats-Studio3 Series headphones and possibly some other types of headphones on the market so beware if you are buying this cable for that purpose.

The highlight of this product is quality materials with a gold plated beveled connector for better connectivity and rust protection and strong materials with dual layer braided foil shielding. With this specification, you can be sure that this cable won't break or stop working anytime soon and with 4 feet long (1.2 meters) it is long enough for most applications.

The manufacturer is confident in their product so they offer 12 months warranty and 100% money-back guarantee which is good to know. (You can also add free 18-month warranty extension after register on their website) With an affordable price and good user reviews, the DuKabel Top Audio Stereo Cable is something you should consider if you need an excellent cable with a good price AUX cable for your home or car.
