

## Best Auxiliary Audio Cables Reviews In Dec 2018

Love 'em or hate 'em, we live in a world of doggone cables and have not quite reached a place where we can totally live without them. Apart from the boring essential uses, we buy cables to listen to music, which is also essential now, come to think of it.

The problem is, though, many so-called auxiliary cables that we buy often do not deliver on what is expected of them. In some, it is the sound quality, in others, it is durability, and still, in others, it could be both. The fact is these short comings are going to make your quality time with music a little sour. So what you need is an auxiliary cable that cancels out all the noise you do not want to hear and exposes your ears to the sounds that really matter.

And that is exactly what we have been up to when we assembled the list below. It is a compilation of brief but detailed reviews of some of the best auxiliary cables that we know of that are commercially available and adept at what they do. Having a problem with your cable? Maybe one of these bad boys will be the solution.

### 1. DuKabel Auxiliary Audio Stereo Cable

**Why we like it:** Thanks to its high-quality construction and materials, this cable could be any audiophile's wet dream.

**Editor's rating:** ★★★★★★

The TOP Series Auxiliary cable is top of the range from DuKabel. It can bring you intensely satisfying high-definition sound quality from any electronic device you are likely to have – your PC, phone, tablet, speaker, the lot. It is a pure audiophile's toy. And that claim is not just sensational,

it is scientific as well. This cable not only impresses us with the materials used to make it but also the build quality in which they are made.

You know the clarity of the connection with this cable is going to be good when you find out it uses oxygen-free copper wiring. The same material also helps it give you that sound quality for a long, long period. The connectors made from 24K gold are guaranteed to be incorruptible by corrosion. Plus, the double shielding that runs through the entire length of the cable cuts out as much irrelevant noise as possible. It is a fantastic showcase of expert design and build quality, and for the final touch, it comes with an 12-month warranty, and plus a free extended 18-month warranty. In total 30-month warranty!

## 2. MillISO 3.5mm Aux to Aux Cable

**Why we like it:** Takes care of performance matters as well as practical matters with ease and comes with a year warranty deal.

**Editor's rating:** ★★★★★☆

The MillISO Aux Cable is a universal aux cable that really knows all about quality sound. The interior is constructed of oxygen-free copper wires that have been enameled. These are wrapped in protective AL-Mylar protective foil and a durable exterior coating that helps your cables to survive for almost ever. This is why they can provide a lifetime warranty; their stuff is so well put together! It has even passed a 15,000-time bend test, making it some of the most durable cabling we've ever seen. This cable is 4 feet long, and each of the male-to-male ends is tipped in 24k gold to give you clean sound and protect your wires from the outside world. All that, and they will work with just about any device you have laying around.
